Our DATASERVICE Foundation of your production processes

In today's business world, data has become a key asset – especially if it's provided quickly and easily to deliver a decisive competitive advantage. And at MACO, our technical support is your gateway to all our data services. That's where you'll find advice and information about all the general and individual services available in your market. Whether you're a manufacturer or dealer, we can offer you all the data you need.

MACOWINPLUS

Configuring customised fittings

Our MacoWinPlus software enables you to configure your hardware fittings quickly and with no errors. The online tool includes the main functions, while the offline version gives you convenient customer management functions. It also enables you to optimise your product range according to your requirements, and use an interface to interconnect the data with your window construction programs and machine control processes. This version needs to be installed and set up by a MACO technician at your site. Just choose which model suits you best:

Your benefits at a glance

- › Error-free configuration of hardware fittings for
 - › more than 250 window, door and sliding systems and
 - › over 300 profile systems (timber, timber/aluminium, PVC, aluminium, aluminium/timber).
- › Price calculation at the touch of a button
- › Convenient management of product range
- › Easy ordering options

| | Online | Offline | | |
|--|--------|---------|------------|--------------|
| | Basis | Trading | Production | Professional |
| Error-free hardware configuration, price calculation, product range management | ✓ | ✓ | ✓ | ✓ |
| Convenient customer management, individual product portfolio | | ✓ | ✓ | ✓ |
| Interfaces to window construction software | | | ✓ | ✓ |
| Processing data for machine control | | | | ✓ |

MACOWINPLUS Online

Our quick and easy solution

The online version of MacoWinPlus enables you to make calculations for your fittings quickly, easily and – most importantly – with no errors. You can also find fitting prices, manage the product range and order at the touch of a button.

MacoWinPlus Online is ideal for you if you're:

- › A manufacturer who doesn't use window construction software – you'll be able to access hardware overviews, parts lists, technical product information from our TOM, and diagrams of the fittings including milling patterns and drilling dimensions.
- › A dealer – you can quickly and easily generate proposals tailored to customer requests.

MACOWINPLUS Offline

The solution tailored to professionals

You benefit from the full range of functions when you have MacoWinPlus installed at your facility. Your use case will determine the license model that's right for you.

- › If you're a dealer, you can define a specific product range and benefit from easy customer management.
- › If you're a manufacturer using window construction software, you can integrate the complex details of hardware fittings into your tool. If your environment is highly automated and your machine park allows it, you can benefit from the integration of the processing data for our fittings with your machine control system.

MACO Technical Online Catalogue (TOM)

Data around the clock

With TOM, you get all the data you need about our products – anytime and always up to date. You can pinpoint the right one by using the product hierarchy, the search function, the product filter, or with a quick click on the part you want in the intuitive hardware overview.

But that's not all! TOM also offers:

- › Detailed product flyers and summary data sheets in table form
- › Six-page view of all products in the practical .dxf format
- › Drilling diagrams, milling patterns
- › All content is downloadable
- › Tailored pricing and simple transfer to the ordering platform (market-specific)

And much more!

Ordering platform Purchasing from MACO

We make it really easy and practical for you to order our products. Our platform offers the following functions:

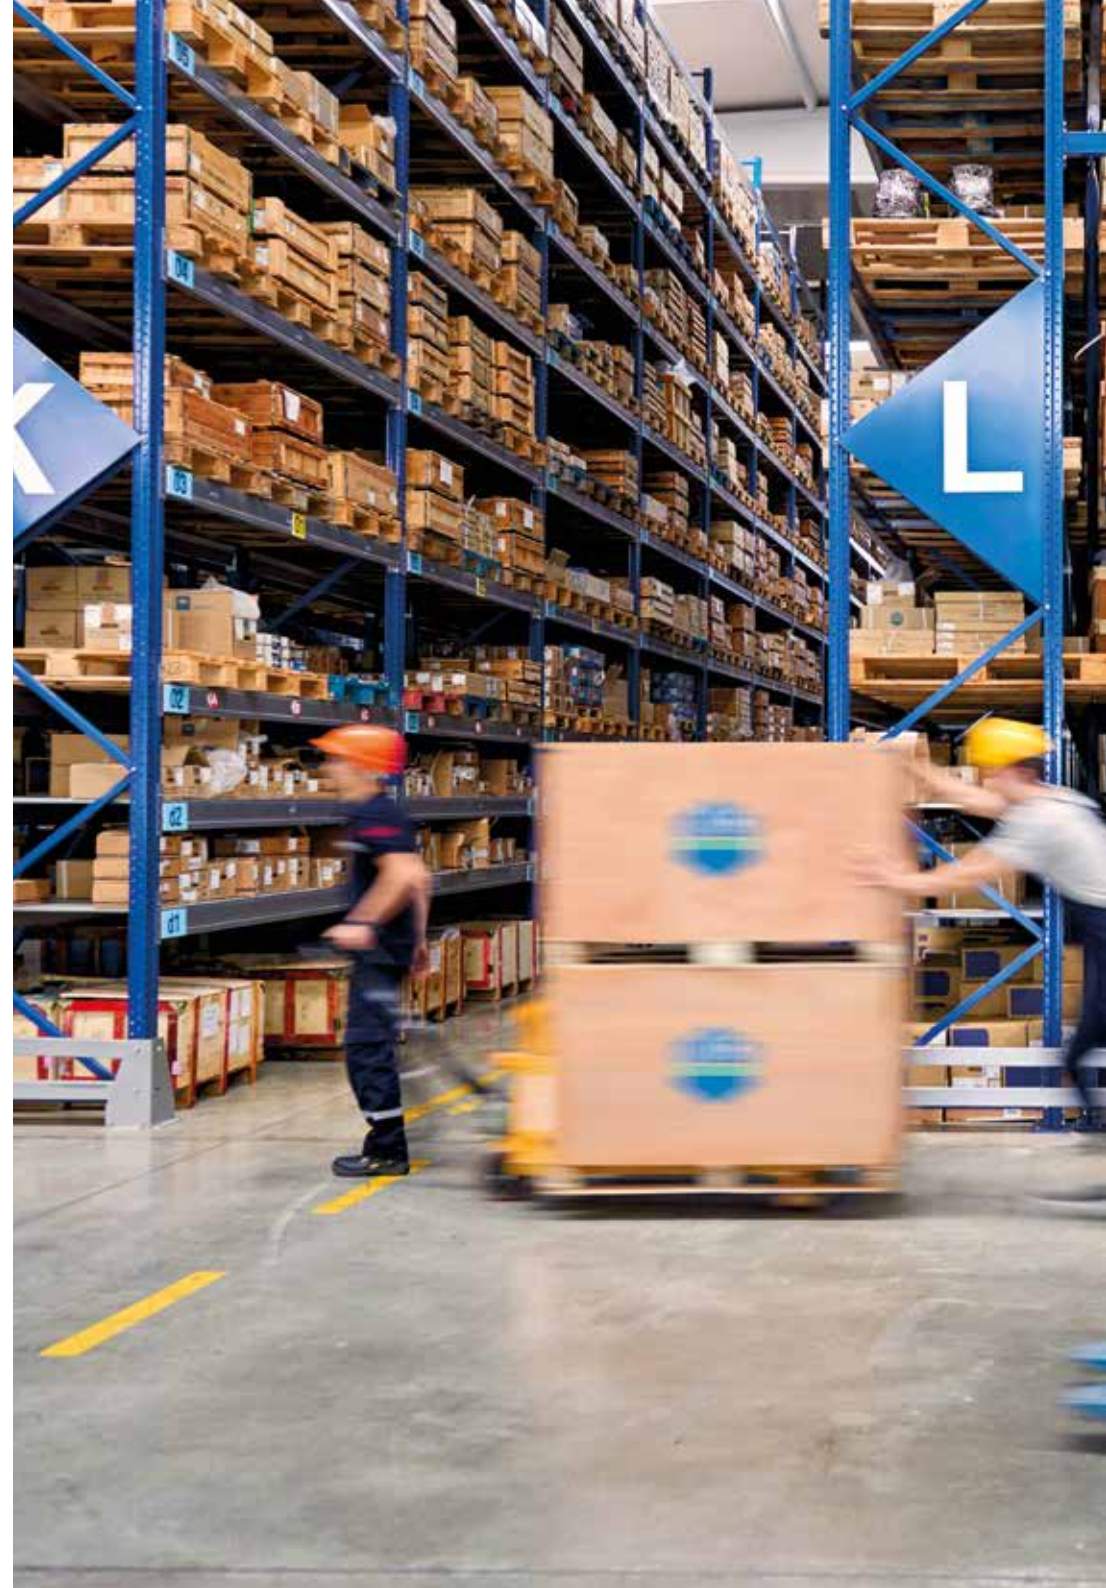

- › Documented orders
- › Creation of reusable shopping cart templates
- › Free text field for your company-internal classifications or deliveries
- › Optional upload of your order in CSV format
- › Price calculation including low-quantity surcharge where applicable
- › Status overview and history of your orders incl. partial deliveries
- › All delivery notes and invoices are downloadable

Interested in knowing more about this service? Just talk to your sales advisor to find out whether the ordering platform is right for you. If you tend to make several regular, job-related orders in small quantities, you'll best be served by one of our dealer partners – as you probably already are.

EDI Integration Order using your ERP

Want to order your products easily and directly using SAP or another ERP system? No problem. Your customer service advisor will be happy to let you know about the prerequisites and process steps.

For our smaller dealer customers: in some countries we have partners (like Nexmart in Germany and Austria) who offer a tailored and cost-effective solution based on a direct connection.

BMEcat Data Export

Catalogue data on a silver platter

BMEcat is a standardised data sharing format that you can use to enrich your product information system or shop system with your supplier's product data. All you need to do is send us a list of items and we'll send you back an XML file with all the product information available in TOM, which includes:

- › MACO catalogue structure incl. product classification
- › Product data with attributes and the related values
- › Technical datasheets
- › Article diagrams / images

You want everything from a single source?

We provide you with complete solutions for sliding doors, windows and doors - for timber, PVC and aluminium. Experience our versatile system offer, comprehensive service included. Discover more of this on our website www.maco.eu or contact your MACO representative.
