SAFETY PIN

THE SASH FALL PROTECTION

Health is our greatest asset – let's protect it! With a window, sash falls caused by incorrect operation can never be completely ruled out, and strong winds are also a danger. So there is always a slight risk of injury or damage - unless a small additional component has the situation under control. The MACO Safety Pin is a unique solution that prevents something from happening when something does happen - it keeps the sash from falling off.

To protect against incorrect operation and overload

For...

- ... all sash weights, window sizes and shapes (except round arches)
- ... Turn, Turn&Tilt, and Tilt&Turn windows

Because...

- ... winds can surprise and bang the window sash
- ... window sashes are seen as a climbing equipment by children
- ... because operating errors and overloads

In action...

- ... wherever people live, learn and work, for example in
 - › office buildings
 - › schools and kindergartens
 - › retirement homes
 - › public buildings

Key technical data

- › integrated in central shutter
- › only two components for sash sizes up to 1,850 mm (four for larger sashes)
- › Jigs available for easy installation
- › for timber and PVC

Would you like everything from a single source?

With us you get complete solutions for your large surfaces, windows and doors – for timber, PVC and aluminium. Experience our versatile systems range with comprehensive service included. Discover more on our website www.maco.eu or contact your MACO customer advisor.
