

TECHNOLOGY IN MOTION

The complete system MACO Multi Matic (IQ) – Quality that endures

Everything from a single source

MACO Multi Matic has been our proven platform with solutions and system components for tilt & turn windows for more than a decade. We offer everything that supports, moves, opens, closes, adds functions and makes them barrier-free. Our entire range of products systematically builds on each other and can be combined. We are also continuously expanding the range as well as improving existing elements – which you can now identify by the “IQ” added to the name. **MACO Multi Matic (IQ) – the complete system.**

Benefits for fabricators

01 Comprehensive full range

Everything from a single source – for windows in every construction depth, including accessories

02 Clever modular concept

Designed for compatibility – for quick installation with elements that can be used in a variety of solutions

03 First-class quality

From the hardware to the look and feel, everything has been developed and manufactured with the utmost care for maximum service life

Benefits for consumers

01 Premium features

From design and function to materials: all MACO solutions offer superior quality.

02 Highly customised

Square, triangular, round or pitched: MACO Multi Matic enables all window designs.

03 Convenient standard features

MACO Multi Matic comes with many functions and security mechanisms included – without requiring accessories.

Innovation

MACO Multi Matic i. S. cam IQ

The new MACO standard: our MACO Multi Matic i. S. cam IQ makes windows more secure and seals better than its predecessor – and all without any additional effort.

With its intelligent self-adjustment, it guarantees the correct position at all times – without reworking. This means time saving during installation, maximum security and noticeably easier to use.

Special features

Maximum security

MACO Multi Matic IQ stands for security down to the last detail. With intelligent fitting parts such as the self-adjusting i. S. cam IQ and a proven system architecture, it offers permanently stable locking, high burglary protection and reliable functionality – for precision in craftsmanship and confidence for the consumer.

Juliet balconies

More light, slimmer frames: with **MACO Multi Matic (IQ)**, attractive Juliet balconies can be constructed from PVC, aluminium and timber window profiles. Our hardware is concealed, yet still supports a load capacity of up to 180 kg. No need to use an external handle enables an aesthetic Juliet balcony on high rise buildings. The tilt ventilation also allows for draught-free room ventilation which is not possible in double door solutions.

TECHNOLOGY IN MOTION

Coordinated solutions for a perfect fit

System components for MACO Multi Matic (IQ)

Handles

Function, security and design: MACO offers ergonomic handle solutions with superior features.

Window rebate vents

Our window rebate vents allow ventilation even when the windows are closed – which is good for the indoor climate and the building structure.

Thresholds

No need to worry about energy loss or condensation: our threshold solutions insulate effectively.
