In a class of its own MACO Espags Mach II

Proven standard for customisation

Safe, functional and reliable: The **MACO Espags Mach II shootbolt espagnolette system** is the traditional choice when it comes to hardware for outward-opening windows. The high-quality workmanship ensures maximum ease of use for years to come. Installation is systematic and fast – even for customised window solutions. **MACO Espags Mach II** also exceeds industry standards and enables construction of windows with burglary protection in accordance with PAS 24.

Benefits for fabricators

01 Easy installation

Quick and secure: The components of the **MACO Espags Mach II shootbolt espagnolette system** can be combined intuitively, are easy to insert into the Eurogroove, and include a version that does not need to be cropped to length.

02 Flexible product variety

One system, many options: In addition to standard windows, **MACO Espags Mach II** enables solutions for single- and double-sash windows as well as side- and top-hung windows. Low handle heights are also possible for easy access on hard-to-reach windows.

03 Perfect fit

Quality down to the last detail: With **MACO Espags Mach II**, contact pressure can be adjusted by plus or minus 0.75 mm. This ensures easy-to-operate windows and optimum thermal performance – at all times throughout the life of the window.

Benefits for consumers

01 Unbeatable security

Better safe than sorry: With central mushroom cams and a combined mushroom and shootbolt corner combination, **MACO Espags Mach II** ensures maximum security with burglary protection in accordance with PAS 24.

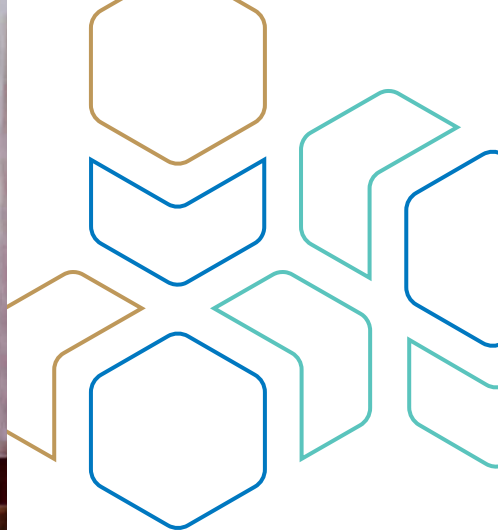

02 Ideal interior climate

Included as standard: With the night vent position, **MACO Espags Mach II** components allow air flow that ensures high air quality in occupied rooms.

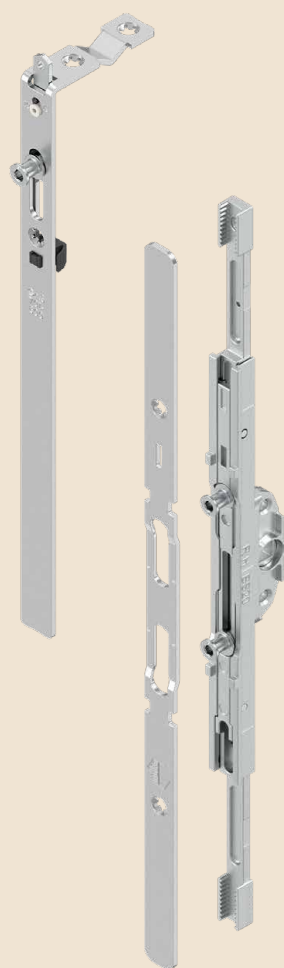

03 Impressive energy efficiency

Saves energy and money: The contact pressure of **MACO Espags Mach II** can be easily adjusted to ensure optimum thermal performance – at all times throughout the life of the window.
