

TECHNOLOGY IN MOTION

The fastest motorised lock

MACO Protect M-TS – convenient and secure

Functionality meets security

From closed to open in 0.3 seconds: The **MACO Protect M-TS** door lock unlocks faster than any other lock on the market. When closing, MACO's proven 3-latch technology generates perfect mechanical contact pressure. This ensures a high level of burglary protection, prevents door warping and improves thermal and sound insulation. The integrated status monitoring can be easily connected to alarm systems and smart home systems.

Benefits for fabricators

01 Quick assembly

Less effort, better solutions: Due to its function and design, milling effort is considerably reduced and standard cylinders can be used.

02 Maximum freedom

Flexibility in production: With **MACO Protect M-TS**, practically any individual door variant can be realised – regardless of material, size and shape.

03 Direct use

Configuration-free: Once the access systems have been installed and activated, doors equipped with the **MACO Protect M-TS** can be operated immediately.

Benefits for consumers

01 Great ease of use

Quiet and fast: The motorisation makes opening and unlocking doors convenient. Whether by app, fingerprint or keypad.

02 High burglary protection

Simply feeling secure: The multi-point locking system closes doors with high contact pressure and thus also increases security.

03 Impressive energy efficiency

Optimal sealing for a better indoor climate: Rain, wind and cold stay outside – and energy and warmth are kept inside.

Special properties

What you can expect from us

Perfect holding and closing force

One solution, many advantages: **MACO Protect M-TS** utilises the proven 3-latch technology, which makes unlocking quick and quiet thanks to the optimum contact pressure. At the same time, burglary protection is increased. The extremely tight seal also keeps rain, wind and cold outside – and keeps the energy and heat inside.

Maximum smart home compatibility

Status check included: The door lock is equipped with lock monitoring ex works and can be easily integrated into alarm or smart home systems. In this way, **MACO Protect M-TS** increases security directly at the door and as an element of property protection for the entire building.

Full operating freedom

Fingerprint, keypad or app: The **MACO Protect M-TS** door lock can be operated with almost any access solution available. And this is particularly convenient directly after installation and commissioning. Programming or configuration knowledge is not required.

TECHNOLOGY IN MOTION

Coordinated solutions for a perfect fit

System components for MACO Protect M-TS

Access systems

Key alternatives: MACO has three access solutions in its portfolio for convenient and secure operation of the **MACO Protect M-TS**: the **Instinct app**, the **keypad** and the **dLine fingerprint scanner**.

Handles, hinges and e-openers

For individual reception: **MACO ProDoor entrance door hinges, handles and e-openers** offer a wide range of options and variants in terms of design and fittings. Together, they create more security, convenience and attractive designs for every day.
