# The automatic door lock

## MACO Protect A-TS – simply secure

# Secure locking without force

Without a key: The **MACO Protect A-TS** door lock locks automatically after closing. This means that manual locking is only necessary as an internal child safety lock. At the same time, the 3-latch technology ensures perfect contact pressure and reliably prevents the door from warping. This also creates the optimum seal that keeps out rain, wind and cold – and keeps energy and heat inside.

## Benefits for fabricators

### 01 Impressive variety of materials

For timber, aluminium or PVC doors: **MACO Protect A-TS** is suitable for use in all material variants without restrictions.

### 02 Wide variety of products

Individuality for installation and retrofitting: **MACO Protect A-TS** enables a wide range of product variants.

### 03 Flexible solutions

Left, right and for sash rebate heights of up to 2,900 mm: The **MACO Protect A-TS** modular system offers great freedom with minimum effort.

## Benefits for consumers

### 01 Secure ease of use

All you have to do is close it: The **MACO Protect A-TS** door lock automatically locks the door at three points and provides immediate security.

### 02 High burglary protection

Simply secure: With its locking principle and high contact pressure, the **MACO Protect A-TS** door lock offers class RC 3 burglary protection.

### 03 Impressive energy efficiency

For greater room quality: **MACO Protect A-TS** closes doors so tightly that rain, wind and cold stay outside – and energy and heat are kept inside.

## Special feature

### MACO Protect A-TS with motor

Open automatically: **MACO Protect A-TS** with motor supplements the standard key release with a motorised version. For example, all you need to do is press a button on the access control or intercom system and the door is unlocked without force.
