The cylinder-operated door lock

MACO Protect cylinder-operated – flexible and secure

More security in a flash

Standard that sets benchmarks: **MACO Protect cylinder-operated door locks** are among the smoothest-running and most secure door locks on the market. Completely customised solutions can be implemented – for doors of up to 3,100 mm high and with bolts, hooks or security bolts for locking. The term “cylinder-operated” refers to the locking method: this is achieved by inserting and turning the key in the cylinder.

Benefits for fabricators

01 Variety of materials

For timber, aluminium or PVC doors: **MACO Protect cylinder-operated door locks** are equally suitable for use in all material designs.

02 Efficient platform

The basis for productivity and individuality: **MACO Protect cylinder-operated door locks** utilise the same striker plate platform as many other MACO lock solutions. This sustainably reduces time and costs.

03 Flexible solutions

Non handed and for sash rebate heights of up to 3,100 mm: **MACO Protect cylinder-operated door locks** offer great freedom of installation with minimum effort.

Benefits for consumers

01 Daily convenience

Durable quality: **MACO Protect cylinder-operated door lock solutions** are particularly smooth-running – which is also noticeable in their service life.

02 High burglary protection

Simply feel secure: **MACO Protect cylinder-operated door locks** enable customised solutions with burglary protection up to class RC 3.

03 Attractive design

Live better: **MACO Protect cylinder-operated door locks** elegantly combine form and functionality to create a harmonious unit that leaves a lasting impression.

Product variants

MACO Protect Z-TS

Security with triple locking: The **MACO Protect Z-TS** is so secure that it was the first door lock to be included in the German police's list of anti-burglary products. It allows hooks, bolts or security bolts to be used – as well as in combination. This increases the burglary protection up to Class RC 3.

MACO Protect Z-TF

Quiet, secure, sealed: The **MACO Protect Z-TF** is a semi-automatic 3-latch lock that is particularly impressive in the version with combined multifunctional latch and hook locking. This means: no warping of the door leaf thanks to the uniform contact pressure over the entire door height. Alternatively, also available in combination with up to four security bolts.

TECHNOLOGY IN MOTION

Coordinated solutions for a perfect fit

System components for MACO Protect cylinder-operated

Handles, hinges and e-openers

For a personalised reception: **MACO ProDoor door hinges, handles and e-openers** offer a wide range of options and variants when it comes to design and fittings. Together, they create more security, convenience and attractive designs for every day.
