MACO Service Solutions
Support that proves its worth

maco.eu

Support from design through to sales
Step by step in the best hands

From the design to the planning and test phase through to production and sales: with the MACO service solutions **Digital Service, Norm Service** and **Product Service**, all the affected processes are made faster, safer and therefore more efficient.

Digital Service

Digitising processes and making them more efficient: With **MACO Digital Service** we achieve this in several ways. During the design phase, the technical online catalogue **eCat** provides all the important information.

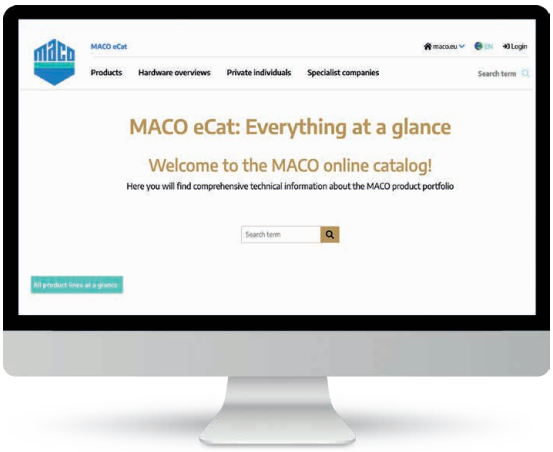

Norm Service

Advice, expert knowledge, licences and reliable tests: for standard-compliant production, **MACO** offers **Indicative Testing**. This results in products that meet the requirements of both legislators and our customers.

Product Service

All the best for production: the wide selection of gauges, tools and machines (**Assembly Tools**) makes installation easier.

Innovation

eCat

The new **eCat** replaces the previous TOM and is the digital reference guide to the entire MACO product range. Freely accessible in the Light version or with many extras such as technical drawings, application information, 6-page views and drilling and milling diagrams, also available for download in the Pro version upon registration in the MACO Partner Portal.

Digital Service
Secure data and information

eCAT

Everything at a glance: **eCat** is the digital reference work for the entire **MACO** product range, including comprehensive and valuable additional information – from technical drawings, application information and six-page views to drilling and milling images. All information can also be downloaded.

TECHNOLOGY IN MOTION

Norm Service
Advice, documentation and licenses

Indicative Testing

With our in-house testing facilities, **MACO UK** is able to provide our customers with **indicative testing** for **PAS 24** compliance and the **BS 6375** performance of windows and doors. Test findings and constructive feedback are provided before the product is tested at an accredited test centre, so you can make any necessary modifications and feel confident that the formal testing will be successful.

Product Service

Assembly Tools

Making everyday work easier: with the **Assembly Tools MACO** offers numerous gauges, tools and machines to make manufacturing processes efficient, time-saving and convenient. The range extends from drilling and installation gauges to setting spanners, press brakes and testing equipment.

Information, solutions, advice
MACO is here for you
